PROFILE

Software Engineer and Full Stack Developer with experience in Web applications, Java-based systems, MERN platforms, Python-based applications, and Android apps. Proven ability to deliver high-quality projects, from responsive UI design to database management. Committed to continuous learning and leveraging emerging technologies to solve real-world problems. Focused on contributing technical expertise and a disciplined work ethic to a forward-thinking development environment.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), Kotlin, C#, C++, SQL

Web & Backend: React.js, Node.js, Spring Boot, WebSockets, JSON, CSS3, HTML5

Database: MongoDB, MySQL (Workbench)

Cloud & DevOps: Docker, AWS (EC2/S3), Firebase, GitHub, CI/CD Basics

Mobile: Android Development (Kotlin/Java), Android Studio

Tools: Postman, Visual Studio Code, Agile/Scrum

PROFESSIONAL SKILLS

Agile Teamwork & Collaboration

Analytical Problem Solving

Fast & Adaptive Learning

Time Management & Prioritization

Strategic Leadership

Technical & Client Communication

PROJECTS

SwiftRide - A Vehicle Renting Platform [🔗](#)

A full-stack ride-sharing web application designed to streamline the connection between users and drivers. Developed using the MERN stack, the platform provides a secure and responsive interface for managing ride requests and user profiles. The project focuses on clean REST API design and robust data handling, ensuring a seamless flow from the frontend React dashboard to the MongoDB database.

Highrise Bot - Bot for Highrise Metaverse [🔗](#)

An event-driven automation tool developed in Python using the HighRise SDK to manage virtual room interactions. It utilizes asynchronous programming (asyncio) to handle real-time game events, such as player movement and chat commands, while implementing a custom command handler for automated moderation and user engagement within the HighRise metaverse.

AuraFlow - Personal Habit Tracker [🔗](#)

A holistic wellness and productivity Android application built with Kotlin and MVVM architecture to help users manage daily habits, hydration levels, and emotional well-being. The app features sophisticated data visualization through MPAndroidChart for tracking health trends. It offers enhanced accessibility through native Home Screen Widgets and Jetpack Navigation.

E Commerce Platform - Buy and Sell Products [🔗](#)

A scalable e-commerce platform built with Java 21, Servlets, and JSP using the MVC design pattern. It features a multi-role system for Customers, Sellers, and Admins, managing everything from secure authentication and product CRUD operations to inventory control. The project utilizes JDBC for MySQL database management and is deployed on Apache Tomcat to handle complex business logic and session-based user transactions.

EDUCATION

Sri Lanka Institute of Information Technology, <i>BSc (Hons) in Software Engineering</i>	2024 – Present
--	----------------

Gamini National School, <i>GCE A/L - Science For Technology (3C)</i>	2021 – 2023
--	-------------

Esoft Metro Campus (PVT) LTD, <i>Assured Diploma in Information Technology (DiTEC)</i>	2019 – 2020
--	-------------

EXTRACURRICULAR ACTIVITIES

Deputy Head Prefect — Gamini National School • **National Cadet Corps** — National Cadet Corps Training Centre - Rantembe • **All Island Guitar Competitions** — 2nd Place in Central Province
